## SUMMARY

Full Stack Developer passionate about building intelligent web applications and integrating modern AI solutions. Skilled in JavaScript (React, Next.js), Python (Django, Flask), and scalable backend architectures. Strong in data-driven design, API development, and cloud deployment.

## PROJECTS

### AI Resume Analyzer

[Code Link](#)

- Built an interactive resume evaluation platform powered by LLMs, analyzing job fit and skill gaps.
- Implemented real-time feedback and skill extraction using the Gemini API and React frontend.

### Weather Insight Dashboard

[Code Link](#)

- Developed a real-time weather forecasting dashboard using Django, Chart.js, and Open-Meteo API.
- Integrated caching and responsive design to reduce load time by 40%.

### VisionTrack

[Code Link](#)

- Designed a real-time vehicle tracking system using OpenCV and TensorFlow for plate recognition.
- Integrated geolocation mapping and analytics dashboard with MongoDB backend.

## WORK EXPERIENCE

### Software Engineer Intern, TechNova

May 2025 – Present

- Assisted in developing AI-driven internal tools and microservices for data processing.
- Collaborated in a cross-functional team to deploy models on cloud environments.

### Machine Learning Trainee, DataSphere Labs

Jan 2025 – Apr 2025

- Developed ML models for solar energy prediction using CatBoost and LSTM architectures.
- Created data pipelines and visualization dashboards for model evaluation.

## EDUCATION

### Bachelor of Technology in Computer Science and Engineering

2022 – 2026

– ABC Institute of Technology

## CERTIFICATIONS

- Google Cloud Certified: Associate Cloud Engineer
- Coursera: Machine Learning by Stanford University
- Microsoft Azure Fundamentals (AZ-900)
- TensorFlow Developer Certificate

# SKILLS

|                        |   |
|------------------------|---|
| Programming Languages  | Python, JavaScript, HTML, CSS, SQL  |
| Frameworks & Libraries | React, Next.js, Django, Flask, TensorFlow, scikit-learn                   |
| Databases & Tools      | MongoDB, PostgreSQL, MySQL, Git, Docker, Power BI                         |
| Domains                | Full Stack Development, Machine Learning, Cloud Deployment, Generative AI |
| Soft Skills            | Problem Solving, Collaboration, Adaptability, Leadership                  |
